Ashtray systems - the Littershark as a meeting place

Enough with overflowing ashtrays! Wherever smokers congregate to take a cigarette break, the Littershark is not far away. Our ashtray systems are stylish and practical, offering a tidy solution for any break room or outdoor area.

Intelligent design

Sleek and chic, the Littershark blends into any environment. The attractive, timeless design fits into any setting and offers a discreet solution for cigarette and ash disposal in break rooms and outdoor areas.

Robust materials

Not only is the design impressive, but also the material. The chrome steel used is low-maintenance, environmentally friendly, easy to clean, and extremely sturdy. What's more, the durable stainless steel makes every Littershark dent and vandal-proof and able to withstand any stress or damage.

Safe and fireproof

The untreated chrome steel can be easily restored even after a serious fire. The Littershark is highly resilient, and thanks to its excellent fire resistance, passes our fire test with flying colours.

Simple and efficient emptying

All of our ashtray models can be emptied quickly, easily, effortlessly and without the need for handling, allowing hygienic disposal of ash and cigarette butts.

All advantages at a glance

- Contributes to a pleasant and spotless environment
- Elegant design
- Practical features
- Easy to clean
- Large capacity
- Efficient and easy emptying
- Sturdy and weatherproof
- Dent and vandal-proof
- Fire-resistant
- Available in several different sizes and designs

The Ashtray family

Indoors or outdoors, our ashtray systems offer the perfect Littershark for every location. Available in various sizes and designs. We will be happy to advise you on the right product for your needs.

Standalone

Smoking zone in your reception area? The standalone Littershark blends elegantly and discreetly into any reception area. With a capacity of two litres, it is the smallest member of our ashtray family, but despite its slenderness it can easily be fixed to any floor.

The Mega Ashtray

With our largest container of 15 litres, this ashtray requires far less frequent emptying. The practical inner container also enables effortless and contact-free emptying. No matter where it is located, if required, the Mega ashtray can be quickly and easily mounted to any type of floor.

Wall or Pole-mounted Ashtray

If space is limited, our wall or pole-mounted ashtray is the ideal choice. Deceptively compact, this design marvel has a remarkable 2-litre capacity. What about emptying? It couldn't be easier!

Oskar Shark with Ashtray

The Oskar Shark is hard to beat in terms of inconspicuousness. Its slim and elegant appearance enhances reception and entrance areas and is a design object in its own right. As a combination of ashtray and waste bin, it offers the optimal solution for keeping public spaces clean and tidy.

Smiley Ashtray

Overflowing ashtrays and litter piling up next to the waste bin? The Smiley ashtray puts an end to this scenario with its combination of 150-litre waste bin and large 12-litre ashtray. This makes it the perfect solution for particularly well-frequented smoking areas.

Ashtray modules

Waste and ash disposal in one: all our Littersharks, which are available in sizes ranging from 35 to 220 litres, can be fitted with an ashtray. For quick, effortless and contact-free emptying, all of our standard Littershark models have an ashtray with emptying flap that, thanks to its spring hinges, makes cigarette butts and ash disappear into the bag or bin in an instant. The ashtray and emptying flap can be cleaned easily and efficiently, and thanks to the large capacity of our Littersharks, requires far less frequent emptying.

The ashtray is located in the top part of the Littershark. The Littershark can be equipped with an ashtray emptying flap or a pull-out ashtray.

Ashtray with emptying flap:
The Littershark comes fitted with the ashtray emptying flap as standard. Pulling down the flap allows rapid disposal directly into the waste bag.

Pull-out ashtray:
The pull-out ashtray can be easily removed with a handle and the ash disposed of in a separate container.

Are you looking for the perfect ashtray system for your entryways, smoking zones and outdoor areas? We are happy to help you find the right solution.

We look forward to hearing from you!
