Fontana drinking fountain: the stylish water dispenser for urban spaces

Fresh drinking water at the push of a button – with the Fontana drinking fountain. Thanks to its minimalist, stylish design, our popular water fountain is an ideal solution for every location, whether it is in the park, along a footpath or in the school playground, producing a flow of fresh water at the push of a button for thirsty people on the move.

A timeless look

The Fontana drinking fountain's high-grade brushed steel body not only makes it a timeless design object, but also guarantees its longevity for many years to come. The water dispenser is also a perfect match for the Littershark family of products, providing a unified look to the area when they are used in combination with each other.

Enjoy fresh water on the go

Whether you need to quench your thirst or wash your hands, coming across fresh drinking water can be a godsend. ANTA SWISS AG offers the ideal solution for public spaces with the Fontana drinking fountain. Wherever it is located, it provides an ever-ready supply of fresh, clean water.

Easy to use and good for the environment

Instructions are given in German, French, Italian and English. At the press of a button, fresh water bubbles out of the nozzle. The Fontana drinking fountain saves precious water as it does not flow continuously.

Easy assembly and maintenance

The integrated drainage sieve and siphon prevent blockages from being caused by foreign bodies such as pebbles. The water dispenser is quick and easy to assemble and has an inlet and an outlet in the centre of the base, which is screwed to the floor to provide stability. If necessary, the large service flap in the back can

be opened quickly and easily using the supplied triangular Littershark key.

- Chrome steel V2A
- H 894mm
- Ø Top - 402mm
- Ø Bottom - 312 mm

Fresh water at the push of a button - quick and easy.

The service flap in the back can be opened quickly and easily using the supplied triangular key.

Inlet and outlet pipes are fed through the centre of the drinking fountain.
