# Fontana drinking fountain

Our Fontana drinking fountain provides quick access to fresh drinking water in public spaces. Thanks to the redesigned service door and push button, maintaining and using it are now even easier. As a member of the Littershark family, the Fontana drinking fountain takes on the task of supplying people in public spaces with clean drinking water at all times. Just press the button and the water starts to flow.

## The advantages

- ✓ Drinking water at the push of a button
- ✓ Timeless design
- ✓ Easy access through large service door on the back
- ✓ Protection against Legionella bacteria thanks to integrated flushing module
- ✓ Integrated drainage sieve and syphon prevent blockages
- ✓ info on the fountain provided in English, German, French and Italian
- ✓ Easy assembly of the base and simple installation of the inlet and outlet
- ✓ Can be customised with your logo

**The integrated drainage sieve prevents blockages.**

**Rotatable tap neck for filling water bottles (recommended for indoor or sheltered locations)**

# Fontana: the inner workings

Drinking fountains in public spaces must be flushed regularly to prevent the growth of Legionella bacteria and ensure that the water is fresh at all times. Our flushing module ensures efficient water usage while minimising wastage.

### Flushing module

The flushing process takes one minute and occurs directly in the siphon, using two litres of water per flush.

The flushing module is powered by two standard 1.5 V AAA batteries.

### Pressure-reducing valve

The default pressure is pre-set at the factory. The water pressure must not exceed four bar.

### Inlet

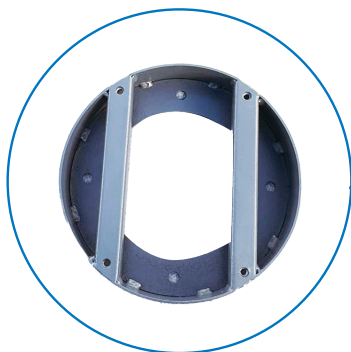

The external thread for the water connection is 0.5 inches.

A siphon is pre-installed for the outlet.

### Outlet

The outlet can be connected here.

### Installation

Large opening for easy pipe installation.

### Dimensions

Height	894 mm
Ø top	402 mm
Ø bottom	312 mm
Material thickness	3 mm
Weight	29 kg

## Solide bench

The Solide invites pedestrians to stop off for a short break. With our ergonomic bench, they can sit back in comfort and watch the world go by. The stainless steel used for the Solide bench is durable and low-maintenance. Rain or snow simply runs off the surface. The seat stays dry and is ready to use again in no time. And the best part: the bench never has to be sanded or painted! With the Solide bench, you can always sit in perfect comfort. Alone, in pairs, in threes or even in fours – the bench is available in various sizes with a backrest or as a stool.

The Solide bench can be installed on asphalt or mounted on grass using concrete elements.

When used as a stool, the Solide bench offers even more seating options.

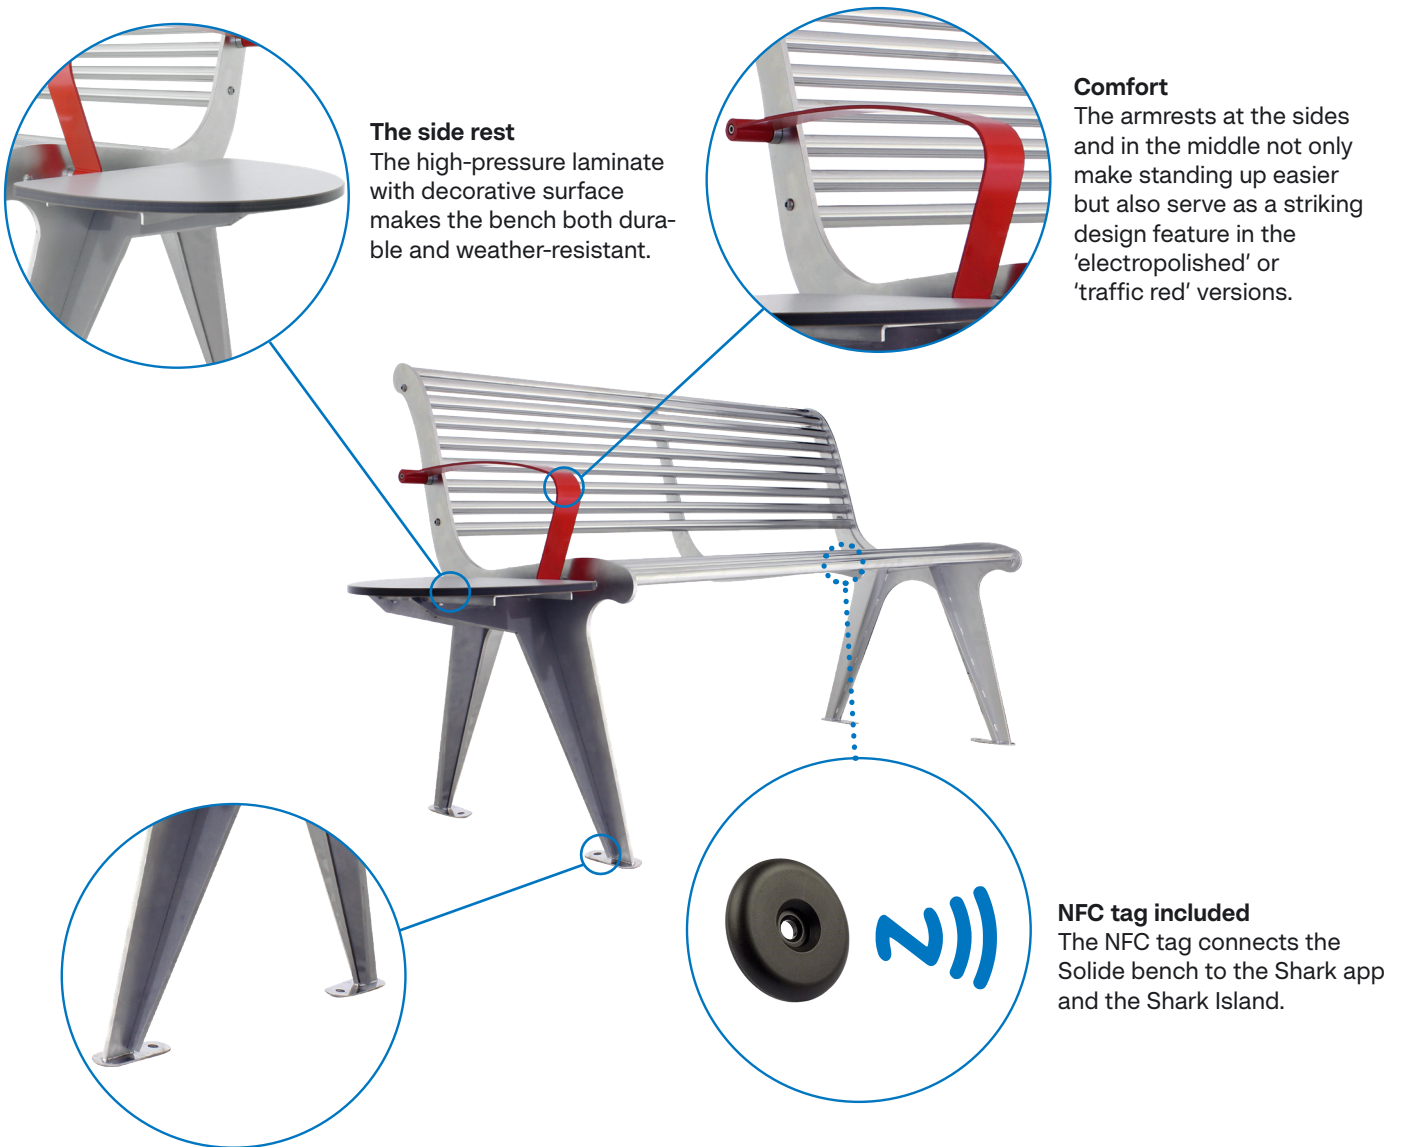

### The advantages

- ✓ Innovative tubular geometry – the bench doesn't get too hot
- ✓ Ergonomic and unique design
- ✓ The side armrest and rounded front edge make it easier for older people to stand up
- ✓ Available as a 2-, 3- or 4-seater version
- ✓ Made of stainless steel, the bench is extremely durable
- ✓ Easy to clean, no maintenance needed

# Solide: the design

Our Solide bench is flexible and can be configured for a variety of uses and needs. Its sleek and modern design contributes to a harmonious urban landscape. The Solide bench combines comfort and functionality. Side armrests make standing up easier by providing extra support and stability. The rounded front edge also makes it more comfortable to stand up by reducing pressure on the legs and knees.

**The side rest**  
The high-pressure laminate with decorative surface makes the bench both durable and weather-resistant.

**Comfort**  
The armrests at the sides and in the middle not only make standing up easier but also serve as a striking design feature in the 'electropolished' or 'traffic red' versions.

**Installation options**  
The bench is easy to install anywhere – be it directly on asphalt, or on grass using a concrete base.

**NFC tag included**  
The NFC tag connects the Solide bench to the Shark app and the Shark Island.

Model	L × H × T bench	Weight
<b>Solide Bench</b>	1212 × 865 × 611 mm	45 kg
<b>Solide Bench</b>	1612 × 865 × 611 mm	60 kg
Stool version	1612 × 496 × 581 mm	44 kg
<b>Solide Bench</b>	2012 × 865 × 611 mm	75 kg

**Durable and elegant solutions for urban living spaces, with attractive designs that enhance public areas.**

# Our services

## Consulting

Good advice is worth its weight in gold. Our experts are on hand to answer all your questions. We'll work with you to find the perfect solution for your needs and the ideal product for your location.

## Augmented Reality

Thanks to state-of-the-art technology, you can use your smartphone or tablet to see quickly and easily what our Littersharks, drinking fountains or benches would look like in any location.

## Installation

We provide personalised support over the phone and offer a variety of installation videos. Additionally, we are happy to install your Littersharks at any location in Switzerland.

## Cleaning

We will drive out to your Littersharks and street furniture in our Shark Cleaning Mobile to clean them ourselves. This not only saves you valuable time and money but also frees up your staff for other tasks.

## Repair

Our products are durable, reliable and sustainable. The robust stainless steel ensures that our products can be easily restored – even after a fire.
